

typed-dsa + Touying

Declarative data-structure diagrams directly inside presentation slides.

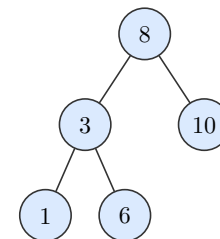

Same source, presentation-ready output

Typst source

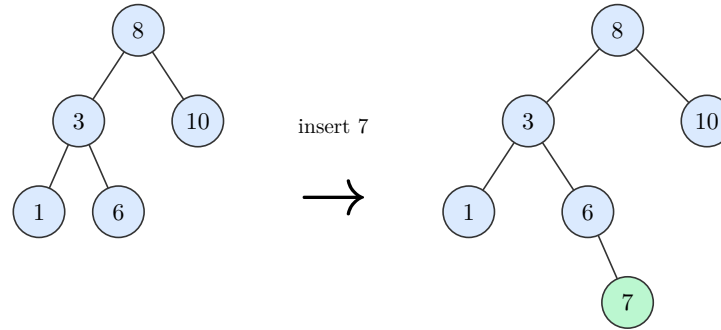

```
#bst(8, 3, 10, 1, 6).diagram
```

Keep examples editable in the same
file as the slides.

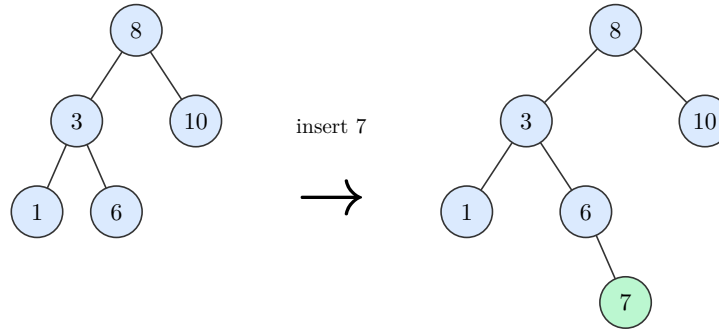

Rendered diagram

Explain operations step by step

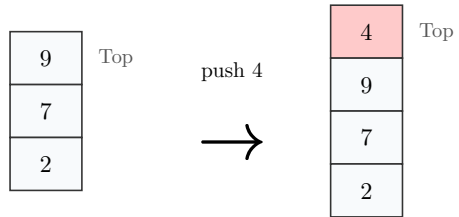

Explain operations step by step

The operation label, before/after state, and highlighted node are generated from the structure operation.

Linear structures fit lecture examples

Stack

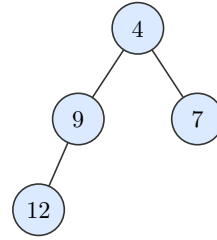

Queue
